FOREWORD

The district census handbook (DCH), compiled by the Census Organisation on behalf of the State Government, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District Administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the villages have been brought together in the village directory with the instruction that in case an amenity is not available in the referent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the village in the district which are inaccessible. A new column, 'total population and number of households' has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled castes and scheduled tribes population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series, it has been so designed that Part-A of the volume contains village and town directory and Part-B the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH, a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and tahsil Police Station/CD Block etc level maps, depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri D.N. Dhir, I.A.S., the Director of Census Operations, Punjab on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N.G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the

preparation of the maps. Data received from Census Directorates have been scrutinized in the Social Studies Division at the head-quarters under the guidance of Shri M.M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

New Delhi,
The 26th April, 1982.

P. PADMANABHA,

Registrar General, India.

PREFACE

As being regularly presented hithertofore, since 1951 census, we have now the privilege of presenting the District Census Handbooks consequent upon 1981 census.

To shorten the time lag to minimum after the compilation of census 1981 data and issuance of this Handbook as a sort of self-contained reference book, predominantly based on census data for the district, action was initiated upon the project as early as July, 1979. The Registrar General, India indicated the revised formats and statements designed for this series. The improvements were with a view to making the data more useful for administrators, planners, scholars and other categories of user .

There are 134 towns categorised as urban area and 12,899 villages (45 tahsils) as the rural area in the state. The formidable task of collecting and compiling of this voluminous data for such a large number of units had its own problems and difficulties, both in the matters of chase up and in obtaining correct data which could be test-checked in terms of consistency with what was obtained and published consequent upon 1971 census data. Several gruelling cross-checks had to be adopted to tally items such as area figures and the land-use patterns for each unit.

The statements and schedules for collecting information from the rural areas were translated into Punjabi and also test-checked to assess their acceptability and responsiveness by those who were to make their use (I had also unsuccessfully toyed with the idea of collecting information on some other items that could indicate comparative affluence of rural Punjab but had to give it up in light of keeping uniformity in presentation of data on all India pattern).

The statements/schedules for town directory were transmitted to the Chief Executives of the local bodies and those for rural areas were transmitted to the SDOs(C) (since all tahsils in Punjab have been converted into sub-divisions) for necessary supply of data by the revenue staff under them. The officers and senior staff of the directorate who had been made directly responsible for houselisting operations and had reported to the field in October, 1979 were also charged with getting these through on personal contacts. This resulted in our getting the feed back by May, 1980, on the conclusion of houselisting operations, though some small instalments of these schedules continued till September/October, 1980.

A cell had been created at the directorate to scrutinize the data as received and make preliminary compilation. The data as obtained from the field was supplemented with the data collected from the various heads of the departments at the state level, particularly in matters of amenities and facilities in the fields of education, medical, communication and the like. The staff working in the cell was once again out in the field for assisting in the second field operation, namely, enumeration and it was only on its conclusion that the work of compilation started in May-June 1981. The three Deputy Directors (at the regional tabulation offices) were in position about the same time in the field and the gaps in data, needing reconciliation in the figures were got done through these field officers on personal contacts with the concerned quarters.

On the compilation of the Primary Census Abstract (PCA) in March, 1982 when the figures were available for projection in this volume, the whole exercise was consolidated to give birth to the instant manuscript.

The data in the book is being presented in two parts—Part A comprises Village and Town Directory and Part B Primary Census Abstract Village wise and Town/Wardwise separately. In addition, Primary Census Abstarct for scheduled castes upto tahsil/town level is also presented. (There are no scheduled tribes in the State).

An analytical note based on a number of inset tables compiled from village and town directory and PCA has also been added for the benefit of the users, but the greater aim has been to present the data as compiled and leave further deeper study for those for whom the publication is meant.

We are grateful to the large number of personnel of the State Revenue Department at the Village, tahsil, sub-division and district levels and the municipal staff in all the local bodies in the State for their cooperation in filling up the statements/schedules for providing the data.

The production of this book (and for that matter all the 12 District Census Handbooks) has been the handiwork of consistent and constant efforts put in jointly by almost all the staff of the directorate, though only at one point of time or the other in certain cases. The collection of data for Village and Town Directory, as mentioned earlier, was a major work in the Pre-Census Period and after the Census, most of the staff was busy in tabulation and compilation of the census data both at the regional tabulation offices and at the directorate. The DCH Cell (Specially created) thereafter commenced work on inset tables, while the senior staff and the officers took to developing the flyleaves and explanatory notes. Simultaneously the map section was deep in work for producing the maps that had to accompany these books.

I would resist the temptation of mentioning any single incumbent at any level of the hierarchy individually for apparent reasons, and would rest content with acknowledging my debt to all of them as appended hereto.

I had acted only as a co-ordinator and at times as an editor and was very ably supported by a set of dedicated officers who spared no pains to push in the manuscripts to the press in a record time, unknown in the annals of this directorate so for.

As in case of other aspects of census work connected with this gigantic decadal exercise, I always looked up to Shri P. Padmanabha, Registrar General & Census Commissioner, India, for guidance, inspiration and encouragement and I feel indebted to him. Shri N.G. Nag, Deputy Registrar General (Social Studies) was forthcoming in his unassuming and profound style for advice.

D. N. DHIR,

Chandigarh:
September, 1982.

Director Census, Punjab.

ACKNOWLEDGEMENTS

Preliminary Work—Collection, Compilation and Scrutiny of data relating to Village and Town Directory

A cell was created in July, 1979 under J. C. Kalra, Deputy Director (now joint Director) who out of his earlier experience and the instructions as received from Registrar General, India, directed the collection of data and allied work. He was ably assisted by D. P. Jain, Charan Singh and Vishwa Mittar, Investigators on one occasion or the other. The Statistical Assistants, who laid down the work at the foundation level at that time consisted of Malkiat Singh, Munishwar Dutt, Joginder Singh and Pawan Kumar with Co-operative efforts of a number of Computors, namely Mohinder Pal, R. P. Pathak, Parkash Chand, Varinder Singh, Hardeep Kaur, Satya Arora, Harbeer Kaur, and Asha Vasisht.

Primary Census Abstract included in this book-manual preparation at the Regional Tabulation Offices at Jalandhar, Patiala and Bathinda:

R. P. Tomer, R.K. Singh and S.P. Grover, Deputy Directors, were incharge of these tabulation offices respectively, and put in their best to conclude the work fairly ahead of the scheduled target. They were assisted by the Investigators, namely, N.S. Bhadauria, Charan Singh and Ajit Singh Dhillon, respectively. The Statistical Assistants and Computors who worked in these RTOs were S.C. Bassi, Balbir Singh, Jai Dev and R.P. Singh at Jalandhar; Tarsem Lal Garg, S.K. Joshi, S.P. Goel and Varinder Singh at Patiala and Balwant Rai (now Investigator), Bhagirath Singh, Raghbir Singh, J.S. Negi and H.P. Sharma at Bathinda.

Preparation of Inset Tables, framework of Handbooks and their drafting:

Inset tables, appendices and allied tables were prepared in the specially created cell of 'District Census Handbooks' headed by S.P. Grover, earlier and later by Ajit Singh, Deputy Directors. They have had experience of such publications earlier and imparted suitable directions to the staff in the cell for presentation of the data and its analysis as per the instructions received from the office of Registrar General, India, from time to time. Charan Singh, Investigator, Balwant Rai, (now Invstigator), Raghbir Singh, Tarsem Lal, Statistical Assistants and Satya Arora, Santosh Kumari, Harbeer Kaur and H. P. Sharma, Computors worked in this cell.

The cell provided the frame work of the Handbook and the first drafts were attempted by Deputy/Assistant Directors who were entrusted with particular volume (s). This first draft was then finalised during discussions in officers' meetings held almost daily with the Director. Thus the final draft emerged.

Maps:

The work for preparation of maps to be included in District Census Handbooks commenced under the supervision of Madhav Shyam, the then Senior Geographer, but mid-way was taken over by G.S. Gill, Assistant Director, who headed the map section during the vital period. He was ably assisted by Jiwan Singh Gill, Artist (now Senior Artist), Usha Kalra, Artist and Kulbir Singh, Draftsman. Because of his knowledge of geography and map work, he delivered the goods depsite the absence of Geographer and Senior Geographer in the directorate.

Manuscript finalisation:

The final draft (s) as emerging out of the deliberations of the officers were entrusted to a cell called as 'Press Manuscript Cell" headed by M.L. Sharma, Assistant Director who was actively assisted by Balwant Rai, Senior Investigator and S. P. Goel and Azad Kumar, Statistical Assistants. They raced against time frequently to give final shape to the volume(s) for onward transmission to the press.

Typing:

K.C. Pardesi, Confidential Assistant (formerly Senior Stenographer) headed this cell. His knowledge of such publications earler was an asset. He was assisted by Ajmer Singh, Stenographer and some of the other typists from the various seats in the directorate.

Printing:

This cell was headed by M.L. Sharma, Assistant Director and actively assisted by H.S. Sudan & Jai Dev. They drew upon the services of others in the directorate, wherever necessary.

PS:

Shri M. S. Mahadeokar Assistant Controller of the U.T. Printing Press cooperated in ensuring that the publication saw the light of the day at the earliest.

To each one of them I acknowledge my thanks.

D. N. DHIR,

Chandigarn
September, 1982.

Director, Census, Puniab

LUDHIANA DISTRICT—A SHORT PROFILE

Location: Ludhiana, popularly known as Manchester of India, is one of the centrally located districts of the Punjab State. Geographically, it lies between north latitude 30°—34′ and 31°—01′ and east longitude 75°—18′ and 76°—20′. Situated on the ridge, just on the off shoot (now known as Budha Nala) of Sutlej river, it is surrounded by Jalandhar district in the north, by Rupnagar district in east, by Firozpur district in west and Patiala and Sangrur districts from the south. The Sutlej river provides a natural boundary from north side separating it from Jalandhar district.

Origin of Name: The district is named after Ludhiana City which is the headquarter of the district. Ludhiana is a corrupted form of Lodhi-ana, meaning the town of Lodhis. The city was founded in the time of the Lodhi emperors on the site of a village called Mir Hota, in 1481. The founders were Yusaf Khan and Nihang Khan Lodhi army generals who had been sent to this side by the Emperor Sikandar Khan, to restore peace and order in the area which was being troubled by the Biluchis. Yusaf Khan crossed the river north ward and settled at Sultanpur. Nihang Khan settled at Mir Hota and gave the place the name of Lodhi-ana or the town of Lodhis. His grandson Jalal Khan, built a fort at Ludhiana on the bank of the Sutlej. At the time, the Sutlej flowed just by the town of Ludhiana at the place where the Budha Nala now flows. Sometime later Lodhi-ana was made a part of the Province of Delhi and of the Division of Sirhind which was directly under the control of the Lodhi Kings.

In the year 1760 A.D. Ludhiana came in the possession of Rais after the downfall of Mughal empire. Rai Kallah improved the fort and it was one of the 'thanas' under his rule. Maharaja Ranjit Singh took possession of the town and the fort of Ludhiana from Bhag Bhari, wife of last Rai ruler in 1806 and gave it to his nephew Raja Bhag Singh of Jind. On the death of Raja Sangat Singh of Jind it was taken under the possession of British. Ludhiana ultimately became a district in 1846.

With the prevailing settled conditions, the district began to develop both socially and economically, Some industries were set up at Ludhiana and the town became a centre of industry and commerce. The hosiery and textile industries were set up in early years of the twentieth century. Khanna and Jagraon developed mainly as commercial centres. More and more people shifted their residence from the rural areas to the urban areas. Ludhiana which had a population of only few thousands came to have about a lakh of population by the time of partition. During 1947, the Muslim inhabitants of the district migrated to the West Punjab and displaced persons from West Punjab settled here in large numbers.

After partition, Ludhiana City acquired greater importance. Being in the centre of Punjab and situated on the Grand Trunk Road and the main railway line, it gradually developed into a main industrial and commercial town of the State. Bicycle and sewing machine industries were also set up in the town. With these developments and with the establishment of specialised institutions like the Agricultural, Engineering and Medical Colleges, Ludhiana attracted students even from distant places. The Agricultural College has since been made a full-fledged Agricultural University. Ludhiana is now the largest city in Punjab with a population of well over 6 lakhs and has become the main centre of work and employment in the State.

Area: According to the Surveyor General, India, the district covers an area of 3,857 sq. kms. and occupies 8th position in the ranking order from the top among the 12 districts of the State, the largest district with an area of 5,874 sq. kms. is Firozpur and the smallest occupying an area of 1,633 sq. kms. is Kapurthala. In this handbook unless otherwise stated, the area figures supplied by the Director of Land Records, Punjab, have been taken for tahsils and villages. Tahsilwise area is indicated below:—

Area (in sq. kms.)

Tahsil		Total	Rural	Urban
Jagraon	..	1,119·7	1,107·5	12·2
Ludhiana	..	1,464·6	1,352·5	112·1
Samrala	..	665·7	654·8	10·9
Khanna	..	534·9	512·1	22·8
		3,784·9	3,626·9	158·0

It would be noticed from the above table that district figures do not tally with the figures supplied by the Surveyor General, India. The difference is due to the fact that tahsilwise area figures for rural area have been supplied by the Director of Land Records, Punjab, whereas the urban figures have been Supplied by the urban Local Bodies.

Climate.—The district resembles in climate to that of Punjab plains, i. e. extremely hot in summer and severely cold during winter. The maximum temperature during May-June shoots upto 46°C in summer and tumbles down to 0.6°C in the months of December and January. Monsoon rains which are comparatively more important for crops are normally received during June—September and Winter rains from mid December to mid February.

Rivers and Drains: Sutlej is the only river which flows along the northern boundary of the district, separating it from the Jalandhar district. The river enters the district at Samrala tahsil after flowing westwards along the border of Rupnagar and Hoshiarpur districts for about 30 kms. It then flows west for about 90 kms. forming the boundary between Ludhiana and Jalandhar districts.

In winter the Sutlej has very little water , at places it is three to four feet deep and just a small stream about 150 metres wide. During the rainy season, however, the river had been notorious for floods but the construction of canals and Bhakra Dam have considerably reduced the volume of water in the river and have mainly controlled the floods.

Besides the Sutlej, there is the Budha Nala flowing along the old course of the Sutlej. It is a perennial stream, which takes its rise near Chamkaur Sahib in Rupnagar tahsil of Rupnagar district and enters Ludhiana district near Behlolpur. Flowing by the side of Ludhiana City, it joins the Sutlej in Jagraon tahsil about 8 kms. towards the east of the boundary of the Firozpur district. The stream has been spanned by two bridges one at Ludhiana City and the other at Machhiwara.

Topography : The entire district is situated on the alluvium. Both the Bet and Dhia lands are very fertile except for some areas of Samrala tahsil where sand ridges abound. The district can be divided into two physical divisions: (i) A low lying alluvial tract along the Sutlej between its old course and the new course known as the Bet and (ii) the land away from the old bed of the Sutlej that is the up-land or Dhia.

Present Jurisdiction : Ludhiana as a district came into being in 1846. It is now one of the four districts constituting Patiala Division. Depending on the administrative convenience of the various State Governments during the period , there have been inter-district and intra-district jurisdictional changes as also upgrading of various administrative units. These inter-census jurisdictional changes have been indicated in the annexure.

The district as at 1981 census comprised 958 inhabited and 26 uninhabited villages and 10 towns. Four new towns, namely, Payal M. C., Hathur N.A.C., Mullanpur Dakha NAC and Machhiwara NAC were added to the district during the decade. Although Hathur NAC was denotified by State Government along with other 15 NACs yet for the purpose of 1981 census, it has been treated as urban area since it was found necessary to freeze the urban frame as on 30th September, 1980. Tahsilwise distribution of villages is as follows :

Jagraon	.. 194	Ludhiana	.. 401
Samrala	.. 265	Khanna	.. 153

Land Utilisation : The economy of the district is still largely agriculture based although there is a trend of shift towards secondary and tertiary occupations. As compared to 50.80 per cent workers who were engaged in agricultural occupations as per 1971 census, 43.84 per cent main workers have been recorded to be engaged in agricultural sector at 1981 census. The total area of the district under cultivation is 86.24 per cent and 92.21 per cent of the cultivated area is irrigated . The main sources of irrigation are canals, tubewells and pumping-sets etc. The percentage of cultivated area has increased by 8.05 per cent from 78.19 per cent in 1960-61 to 86.24 per cent in 1979-80.

Because of the 'Package Programme' for increased production the area under high yielding varieties of various crops is continuously increasing from year to year. The Punjab Agricultural University at Ludhiana has played a magnificent role in the development of modern techniques to raise agricultural production and the farmers of this district have taken full advantage of the various programmes initiated in the district Wheat, Maize, groundnut, cotton and sugarcane are the major crops of the district. The district has the distinction of having the highest yield per hectare in wheat in India also. This district leads major wheat growing countries of the world in yield per hectare. Wheat occupies about 77 per cent of the total cultivated area in this district. Remarkable achievements have been made in increasing the production of wheat both by increasing area and per hectare yield. The high yielding varieties of wheat were first introduced in this district during the Rabi season of 1965-66 in an area of 70 hectares covering about 100 farming families. Due to intensive follow-up, the area under the high yielding varieties of wheat increased by 97 per cent during 1969-70 and in 1971-72 the whole of the area under wheat was covered by the high yielding varietie against 70 per cent coverage in Punjab. Ludhiana district's contribution to the central wheat pool from ons hectare of wheat is 8 times that of India and about double that of Punjab according to the information releaseed by the Punjab Agricultural University, Ludhiana.

Ludhiana District has beaten Japan in Paddy production. The average per hectare of paddy yield has been estimated at 57.42 qunintals which is not only the highest in the country but also exceeds Japan's record

of 56.70 quintals. The production of wheat was 9,04,000 m. tonnes in 1979-80 as compared to 1,67,700 in 1960-61. The production of rice was 3,13,000 m. tonnes in 1979-80 whereas it was 3,100 m. tonnes in 1960-61

Animal Husbandary :

There has been a tremendous increase during the last ten years in cattle wealth, raising the number from 5,93,800 in 1966-67 to 7,32,300 heads in 1978-79. The poultry stock also more than trebled during the same period and has increased from 1,29,500 in 1966-67 to 4,00,900 in 1978-79. The cattle wealth includes cows, bullocks, bovines, horses and ponies, donkeys and mules, sheep and goats, camels and pigs.

Communications Railways and Roads :

The district is fairly well connected by a network of railway lines and metalled roads.

Three railway lines namely Amritsar-Ambala, Ludhiana-Firozpur and Ludhiana-Dhuri-Jakhal serve the district. Amritsar-Ambala line enters the district at Phillaur serving Ludhiana and Khanna tahsils. Ladhowal, Ludhiana, Dhandari Kalan, Sahnewal, Jaspalon Chawa, Payal and Khanna railway stations lie on this route. The Ludhiana-Firozpur line passes through western half of Ludhiana tashil and the middle of Jagraon tahsil. Baddowal, Bhanohar Punjab, Mullanpur Chowki Man, Jagraon and Nanaksar are the railway stations located on it. The Ludhiana-Dhuri-Jakhal line runs through Ludhiana tahsil in southernly direction connecting Gill, Jassowal and Qila Raipur.

The Grand Trunk Road or the National Highway No. 1 passes through the territory of the district. Ludhiana city is located on this highway which connects it with Ambala, Karnal, Panipat and Delhi in the south and with Jallandhar and Amritsar in the North. The state Highways passing through the district are Ludhiana-Sangrur-Patran-JindRoad, Kharar-Ludhiana-Firozpur Road. The major and minor district roads are confined within the boundaries of the district and serve as important links between different regions. The more important among these are the Khanna-Samrala-Rahon-Nawashahr-Garhshankar Road, Malerkotla-Jarg-Khanna Road, Jagraon-Raikot and Malerkotla Road, Ludhiana-Rahon Road.

The road length which was 580 kms. in 1966-67 rose to 2,363 kms in 1977-78. giving a road length of 70 per 100 sq. kms as compared to 15.29 kms then. The roads per lakh of population has risen from 45.31 kms in 1966-67 to 155.51 kms in 1977-78.

Amenities :

The district has recorded at 1981 census literacy rate of 50.60 per cent as against 42.63 per cent at 1971 census which is higher than the literacy rate for the state (40.86) and other districts of Punjab. The improvement in literacy rate is mainly attributed to greater facilities of education available in the district as compared to the other districts of State. The district had in 1979 24 Art and Science colleges as against 22 in 1967, 231 High/Higher Secondary schools as against 128 in 1967, 147 Middle schools in 1979 as against 90 in 1967. In the matter of medical facilities the district had 27 hospitals, 11 primary health centres and 124 dispensaries in 1979-80. Number of hospital beds increased from 1,024 in 1962 to 2,651 in 1979-80.

On an average there were 10.19 post offices per 100 sq.kms. in area in 1978-79. There were six telephone exchanges in 1978-79 in the district.

All the inhabited villages and towns in the district are served bychain of water works to cater to potable water supply to the inhabitants. There is 100 per cent electrification in the district both in rural areas and the urban areas.

The district has come to occupy a central position on the Punjab map and a place of pride on the industrial map of the country which is due to very good means of communication and better civic amenities available in the district.

Present Demographic Picture :

The district had a total population of 18,18,912 persons (9,78,276 males and 8,40,636 females) as per 1981 census. The density of population as recorded at 1981 census worked out to 472 persons per sq. km. which is substantially higher than the state density of 333 persons per sq. km.

Sex-ratio :

There is an improvement in sex-ratio of the district, it being 859 at 1981 census as Sahib are located here. census but sex-ratio of the district is significantly lower than the state figure of 879 at 1981 1555. Bhaini Sahib is 17 of the district is lower than the sex-ratio of all the districts of Punjab.

Growth rate:

The growth of population of the district during the decade 1971—1981 was 28.09 per cent as against 23.89 per cent for the Punjab State as a whole. The substantially higher growth rate of the district as compared to the state is attributed to higher employment opportunities available in the district provided by both industry and agriculture sectors which are attracting migrants from the other districts of the state as also from other states of the country. Rural and urban percentages of growth in population tahsilwise during 1971—81 are furnished below:—

Tahsil		Total	Rural	Urban
Jagraon	..	21·00	17·81	38·54
Ludhiana	..	31·70	9·89	51·15
Samrala	..	22·72	15·90	170·65
Khanna	..	29·11	15·04	91·24

Urban Population :

The istrict has recorded a 42.01 per cent of its population in urban areas against the corresponding state percentage of 27.68 per cent as at 1981 census.

Literacy :

The percentage of literates to total population for the district at the 1981 census is 50.60 as compared to 42.63 per cent at 1971 census and the corresponding state percentage of 40.86. The district ranks first in terms of litera cy among the districts of the State.

Occupations:

The percentage of main workers to total population works out to 30.39 in 1981 census which is slightly higher than corresponding percentage 29.57 observed at the 1971 census and the corresponding state figure of 29.35 The female work participation rate is 2.51 per cent and the male work paticipation rate is 54.35 per cent. The percentage of female workers has recorded a significant increase by 1.08 from 1.43 in 1971 to 2.51 at 1981. The male work participation rate (54.35) for the district is higher than the overall male work participation rate (53·15) worked for the state at 1981 Census and the district rate of 53.40 recorded at 1971 census. There has been a decline of 6.96 per cent in working population in primary sector during the decade of 1971—81 and corresponding increase in secondary and tertiary sectors which is an indication of the shift in the economy of the district from agriculture to industry.

Trade and Commerce:

The district being centrally located on the map of Punjab, has very good means of communications. Land is fertile and is used intensively for agriculture. Industry is well developed and quite diversified. On account of all these factors, the district has attained an advantageous position in trade and commerce. The district is surplus in agricultural products and has some very good regulated markets, such as Ludhiana, Jagraon, Raikot, Mullanpur, Khanna and Samrala, where the surplus commodities are brought for sale. Wheat is the Principal crop in all the markets. Jagraon leads in cotton, Sarson, Gur and maize. Large quantities of potatoes and onions are brought in Ludhiana market.

Among the agricultural commodities the important exports are of wheat, wheat-flour, gram, groundnut and cotton. Bones, hides and skins are also sent out in substantial quantities. Among the export of manufactured articles, hosiery goods top the list and among other exports are worsted wool, moped, cycles and cycle parts, sewing machines, agricultural implements, including oil expellers, oil-engines and sheet metal products. Woollen hosiery goods are exported to a large number of countries, including Russia, East European countries, Africa, Middle East and Far East Asian countries. Engineering goods, cycles and cycle parts are exported to a number of countries against shift in competition with traditional exporters of these goods.

Among imports into the district are salt, sugar, coal, kerosene oil, motor-spirits, metals, cotton piece-goods, gunny bags, woollen cloth and machinery.

Industry:

The district has made rapid strides in the fields of industry. This is primarily due to the industrial development of Ludhiana city rightly called the home of small scale industries in the state, owing to its premier position in hosiery manufactures, engineering goods, mopeds, sewing machines, and cycle industry. More than 80 per cent demand of the entire country in woollen hosiery is met by Ludhiana. LudhianaWoollen hosiery goods and engineering goods are exported to a number of countries,

Ludhiana has earned a name in the manufacture of Hero Majestic mopeds. Previously manufacture of Pearl-Yamaha was started but was stoped subquently due to collaborations difficulties with a Japanese firms It is a tribute to the industrial skill of Ludhiana people that in a little over three years since October, 1978 when first moped was manufactured in Ludhiana, they have successfully put more than one lakh mopeds on the roads. Hero Majestic moped manufactured in Ludhiana is known for its low Price, elegant look and satisfactory service to consumers all over the country.

The other industrial units in the district are sewing machines and their parts, nut and bolts, automobile parts, agriculture implements, diesel engines, electrical goods, oil expellers, chaff cutting machines and threshing machines. Steel is rerolled and some units manufacture surgical instruments, bolt fasteners, antennas, electrical fans, pipes, band, saws, etc.

The phenomenal expansion of the industry in this town has earned it the titles of "Manchester of India and "Osaka of India."

There are about 59 large and medium size industries and about 15,000 small scale registered units flourishing in Ludhiana city with an annual turn over of about Rs. 765 crores. An equal number of units are functioning in the district without proper registration with the industry department.

The number of registered factories in the district was 1971 in 1979 as compared to 534 in 1960. The number of workers employed in these factories was 54,591 in 1979 as compared to 10,564 in 1971. Industrial activity has also permeated to other smaller towns of the district, like Khanna, Jagraon and Samrala. Khanna in particular is a fast growing centre of small industries such as sewing machines, cycles and cycle parts and woollen hosiery. Samrala and Jagraon towns are also catching up in industry with the establishment of iron re-rolling plants, etc.

The Punjab government has set up an industrial focal point at Dhandari (near Ludhiana city) for development of small industries in the rural areas. With the establishment of this focal point a number of large scale units, have come up there which have created more employment avenues. The state government is also setting up a Test House in the focal point. A Central Tool Room built at a cost of Rs. 4 crores which has also started functioning in collaboration with West Germany. This Tool Room has helped the industrialists of this region in bringing more sophistication and precision in their products.

The State Government has also planned to set up a Research and Development Centre each for the bicycle and sewing machine industries. A UN-Aided Knitwear Facility Centre has been set up in the focal point for the promotion of hosiery industry here.

The Punjab Government's policy to develop small scale industrial units in the rural areas has also made some headway in this district. It is estimated that more than 800 small units have come up in the rural areas with the help of loans extended by the commecrial banks. These are small units manufacturing leather goods, durries, shawls and shoes.

In fact Ludhiana district has surpassed all the districts in the state both in the field of agriculture and small scale industries during the last two decades. Now Ludhiana district is known all over the world in certain economic fields, wheat production and hosiery manufactures in particular.

At Sunet, a village some five kms west of Ludhiana, there are several mounds indicating the site of a city in ancient times. After examining the bricks, sculptures and coins of these mounds, Cunninghum was of the view that a town existed here more than 2,000 years back as the coins of King Uttam Datta and Amogha Bhuti had been found in the mounds of this place. A town flourished during the period of the Indo-Scythian rule during the reign of Somanta Deva, a Brahman King of Kabul and the Punjab. The town seems to have been destroyed either in one of the invasions by Mahmood Ghazni or by an earthquake.

Historical places:

A few districts in Punjab have more important places of historical interest than Ludhiana which was situated on the highway from the Central Asia to Delhi. Some decisive battles for the Indian Empire took place in the neighbourhood of Ludhiana. The Sutlej formed the boundary between the possessions of East India Company and the Kingdom of Lahore ruled by Ranjit Singh. It was at Ludhiana that the Frontier Garrision of British Army was stationed before the Kingdom of Lahore was annexed by the British. The other important places of archaeological interest in the district are in the present villages of Sunet, Machhiwara and Bhaini Sahib. There are mounds spread over a large area near Machhiwara and five wells made of large bricks to the west of the town indicating the existence of a large town here in the long past. The word Machhiwara means the place of fishermen. During the Sikh regime, Machhiwara was the headquarters of the Sodhis, who built a large brick fort. now occupied by police station and a Diwankhana. Machhiwara was also the centre of activities of Guru Gobind Singh against the Mughals. Two historical Gurdwaras viz. Charan Kamal and Chubara Sahib are located here. There is the Ganje Shahidan a tomb of persons who died in the battle of Machhiwara in 1555. Bhaini Sahib is 17 kms. from Ludhiana towards Chandigarh. The founder of the Sect of Namdharies or Kukas as they are sometimes

called, Satguru Ram Singh settled here between 1850 and 1860 and since then it continues to be seat of this sect. The simple rural setting of the place is in line with the reforms of simplicity and purity which the founder of the sect tried to bring about among the Sikhs. The Namdharis are known for their love and respect for cows. An annual fair is held here during the month of Bhadon when Namdharise from all parts of country assemble here and take part in the havan, recitations and other religious rites led by the Satguru.

ANNEXURE

JURISDICTIONAL CHANGES

Ludhiana District:

Inter-district changes :

Samrala tahsil gained 6 villages from Balachaur tahsil of Hoshiarpur district. (As shown in Annexure VII)	No. 2/2/(RGI)-8847-79/7399, dated 26th December, 1979

Intra-district changes :

(i) Ludhiana tahsil lost villages of sub-tahsil Payal to newly created Khanna tahsil. (As shown in Annexure VIII)	
(ii) Samrala tahsil lost 21 villages and villages of sub-tahsil Khanna to newly created Khanna tahsil (As shown in Annexure IX)	
(iii) The newly formed Khanna tahsil comprising the villages of sub-tahsil Khanna and 21 villages of tahsil Samrala and sub-tahsil Payal of Ludhiana tahsil	No. 2/5/(RGI)-6112-79/5326, dated 10th September, 1979
(iv) Jagraon tahsil lost village Hambran, H.B. No. 2 to Ludhiana tahsil (As shown in Annexure X)	No. 2/2/(RGI)-8847-79, 7399, dated 26th December, 1979

INTRODUCTION TO DISTRICT CENSUS HANDBOOK

Keeping in view the needs of planners, for exhaustive infrastructural and amenity data upto village level, required for micro level planning, the formats of the village and town directory of 1981 D.C.H. series have been redesigned and some new features useful for planning have been added while maintaining the comparability with 1971 data. A few new items of information such as adult literacy centres, primary health sub-centres, community health workers in villages, etc. have been introduced to meet some of the requirements of revised minimum needs programme. A new item "approach to village" has been introduced to give an idea about the villages in the district which are inaccessible. A new column "Total population and number of households" has been introduced to examine the correlation of amenities with the population and number of households they serve. Two more appendices namely (i) listing the villages where no amenities are available and (ii) list of villages indicating ranges according to the proportion of scheduled castes to total population have been added with the same object in view. A significant addition is class of the town in all the six statements of the town directory which alongwith population and decadal variation since 1901 to 1981 will prove quite useful for analysing the infrastructure of amenities in the urban area of state.

Contents.—The 1981 D.C.H. series have been divided into two parts. Part A contains village and town directory and Part B, PCA of villages and towns and PCA for scheduled castes upto tahsil/town levels. Both parts are being published in this volume.

The village directory contains information about total area of each village in hectares, total population and number of households, amenities/conveniences available in the village, staple food of the people and the land use pattern. There is also information about the nearest town and its distance from the village and approach to the village.

The town directory presents data on each town with the aid of six statements giving the status and class of the town, the decadal population and growth rate since 1901—1981, physical and locational aspects municipal finance and availability of amenities/facilities like medical, educational, banking. etc., trade, commerce and industry.

PCA incorporates tahsilwise data for each village and each town/ward under the following heads :

(I) Area in hectares/sq. kms.

(II) Number of occupied census houses

(III) Number of households

(IV) Total population

(V) Scheduled castes population (there is no scheduled tribe in Punjab State)

(VI) Literates

(VII) Main workers classified into four categories of cultivators, agricultural labourers, households industry and other workers.

(VIII) Marginal workers

(IX) Non-workers.

Maps : The map of the district and a map for each tahsil of the district have been included.

The district map shows the district boundary and location of its headquarters, tahsil boundaries and location of its headquarters, national highway, state highway, important metalled roads, railway lines, rivers and streams, towns and census villages according to population size, post and telegraph offices, degree colleges and technical institutions, rest houses, etc.

The tahsil map contains boundary of tahsil and location of tahsil headquarter, villages with location code numbers, villages with population size, uninhabited villages with location codes, urban areas with location codes, roads, railways and service facilities such as post and telegraph offices, higher secondary schools, hospitals etc.

Besides both the district and tahsil maps have an inset map where additions or loss of territory that has aken place during the decade, has been shown.

Sources : Whereas PCA contains census data, for compilation of village and town directory, the relevant schedules alongwith comprehensive instructions, were sent to the revenue officers (for rural areas) and executive officers of municipal bodies (for urban areas) to be filled in at their end. The completed schedules were collected from the relevant quarters during the houselisting operations in April, 1980 by the staff of this directorate. The schedules were scrutinised at the directorate and the directories were compiled therefrom.

Census Concepts and Definitions

Village and town directory :

Rural-Urban classification.—The 1981 census data are being presented by rural and urban areas, as in the previous censuses.

As far as rural area is concerned 'village' has been adopted as the lowest census unit.

Rural area : *'Village'*—The definition of the village adopted in census is identical with that of 'mauza given under section 3(i) of the Punjab Land Revenue Act, 1887. It is the 'revenue estate' determined as such for the purpose of levy and collection of the land revenue. The revenue estate is defined in the Act *ibid* as an area:

(a) for which a separate record of rights exists ; or

(b) which has been separately assessed to land revenue, or would have been so assessed if the land revenue had not been realised or compunded or redeemed; or

(c) which the State Government may by general rules or specific order declare to be an estate.

The village is thus not merely the *abadi deh* (red lined area) for census taking but the entire land coming within the fixed boundaries of each village in terms of the act *ibid.*

There are 1,013 villages (including 26 uninhabited and 29 since covered in urban areas) in Ludhiana district.

Urban Area : *'Town'*—The following definition of an 'urban' area has been adopted at the 1981 census which is analogous to the criterion adopted in 1961 and 1971 censuses with some minor variation (as indicated below) :

(a) All places with a corporation, municipality or cantonment board or notified town area.

(b) All other places which satisfied the following criteria :

(i) a minimum population of 5,000 ;

(ii) at least 75 per cent of the male working population engaged in non-agricultural (and allied) activities; and

(iii) a population of at least 400 per km² (or 1,000 per square mile).

The urban criterion of 1981 census varies slightly from that of 1961 and 1971 censuses, in that males working in activities such as forestry, logging etc. were then treated as engaged in non-agricultural activity. It, therefore, contributed to the 75 per cent criterion in 1961 and 1971 censuses whereas in the 1981 census these activities have been treated as on par with cutlivation and agricultural labour for the purpose of this criterion.

Prior to the 1961 census, the definition of 'Urban' areas was somewhat liberal and a lot was left to the discretion of the local authorities. At the 1971 census, the state directors of census operations were also give discretion in marginal cases to include, in consultation with the State Government, a place that had other distinct urban characteristics, or to exclude an undeserving place from being treated as 'Urban'.

Urban agglomeration (*UA*): Apart from town/city (a town with a population of one lakh and above), the 1971 concept of urban agglomeration is also adopted for the 1981 census. Very often large railway colonies, university campuses, port areas, military camps etc., come up outside the statutory limits of the city or town but adjoining it Such areas may not, by themselves qualify to be treated as towns but if they form a continuous spread with the town, they are outgrowths of the town and deserve to be treated as urban. Such towns together with their outgrowths have been treated as one urban unit and called 'urban' agglomeration.

An Urban agglomeration may constitute :

(a) A city with continuous outgrowth (the part of outgrowth being outside the statutory limits but falling within the boundaries of the adjoining village or villages) ;

(b) one town with similar outgrowth or two or more adjoining towns with their outgrowths as in (a), or

(c) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Standard urban area (S.U.A): A new concept of standard urban area (S.U.A.) as introduced in 1971 census was also followed for the 1981 census. The essential requirements for the constitution of a standard urban area are:

(i) it should have a core town of a minimum population of 50,000 ;

(ii) the contiguous 'areas' made up of other urban as well as rural administrative units should have mutual socio-economic links with the core town; and

(iii) in all probability this entire area should get fully urbanised in a period of two or three decades.

Certain S.U.A.s were determined on this basis in 1971 and some basic data were presented for 1951, 1961 and 1971 census for such areas and their components. Similar data are being presented for the S.U.A.s. in 1981 also. The idea is to present basic data for these areas for four to five decades so that the urbanisation process in those areas can be studied.

DEMOGRAPHIC CHARACTERISTICS BASED ON ANALYSIS OF INSET TABLES (PRIMARY CENSUS ABSTRACT)

Population :

TABLE 1

Population, Number of Villages and Towns, 1981

Sl. No	Name of Tahsil	POPULATION									No. of Villages		No. of Towns
		Total			Rural			Urban			Total	Inhabited	
		P	M	F	P	M	F	P	M	F			
1	2	3	4	5	6	7	8	9	10	11	12	13	14
1	Jagraon	3,50,744	1,83,879	1,66,865	2,88,807	1,51,688	1,37,119	61,937	32,191	29,746	194	189	3
2	Ludhiana	10,14,254	5,51,945	4,62,309	3,99,087	2,13,281	1,85,806	6,15,167	3,38,664	2,76,503	401	366	2
3	Samrala	2,10,500	1,12,186	98,314	1,90,055	1,01,352	88,703	20,445	10,834	9,611	265	260	2
4	Khanna	2,43,414	1,30,266	1,13,148	1,76,823	94,909	81,914	66,591	35,357	31,234	153	143	3
	District	**18,18,912**	**9,78,276**	**8,40,636**	**10,54,772**	**5,61,230**	**4,93,542**	**7,64,140**	**4,17,046**	**3,47,094**	**1,013**	**958**	**10**

Table 1 shows sex-wise population, number of villages and towns tahsilwise. It shows that district Ludhiana had 958 inhabited villages and 10 towns wherein 18,18,912 persons (9,78,276 males and 8,40,636 females) were living as at 1981 Census. 42.01 per cent population of the district lives in urban areas compared to 27.68 per cent population of the state as a whole. Ludhiana tahsil is the most urbanised with 60.65 per cent of its population living in urban areas, followed by Khanna tahsil with 27.36 per cent of its population living in urban areas. Samrala tahsil is the least urbanised with only 9.71 per cent of its population residing in urban areas. The proportion of urban population in Jagraon tahsil is 17.66 per cent. The reason for lowest proportion of urban population in Samrala tahsil is that there are only two small towns viz., Samrala (Class IV) and Machhiwara (Class V).. in this tahsil.

Sex-ratio :

The sex-ratio for the district is 859 females per 1,000 males as against the corresponding state figure of 879. Th district has shown a substantial improvement in sex-ratio, increasing to 859, in 1981 from 846 in 1971. The highest sex-ratio of 907 has been observed for Jagraon tahsil and the lowest 838 for Ludhiana tahsil Samrala and Khanna tahsils have sex-ratio of 876 and 869 respectively.

Growth rate :

TABLE 2

Decadal Change in Distribution of Population

Tahsil	Population						Percentage decadal (1971—81) variation		
	1971			1981					
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10

Khanna	1,88,531	1,53,711	34,820	2,43,414	1,76,823	66,591	+29·11	+15·04	+91·24
District	**14,20,055**	**9,25,993**	**4,94,062**	**18,18,912**	**10,54,772**	**7,64,140**	**+28·09**	**+13·91**	**+54 66**

Table 2 shows change in distribution of population during the decade 1971—81 for the district and its tahsils. The district has shown a growth rate of 28.09 per cent as against the state growth rate of 23.89 per cent, rural growth rate is 13·91 per cent as against state rural growth rate of 17.48 per cent and the urban growth rate is 54. 66 per cent as against the state urban growth rate of 44.51 per cent. The highest urban growth rate of 170·65 per cent has been recorded by Samrala tahsil and the lowest (38.54%) by Jagraon tahsil. Khanna and Ludhiana tahsils have recorded urban growth rate of 91.24 per cent and 51.15 per cent respectively. The highest urban growth rate in Samrala tahsil is attributed to addition of a new town of Machhiwara with a population of 9,621 persons.

Villages :

TABLE 3
Distribution of Villages by Population Ranges

Range of population	No. of inhabited villages in each range	Percentage of inhabited villages in each range
1	2	3
Less than 200	85	8·87
200—499	201	20·98
500—1999	545	56·89
2000—4999	120	12·53
5000—9999	7	0·73
10000+	..	..
Total	**958**	**100·00**

Table 3 gives distribution of villages according to popultion ranges. The district has 958 inhabited villages, 26 uninhabited villages and 29 villages which have been merged in towns as per 1981 Census. There is preponderance of middle size villages of population range 500—1999, their number being 545 and their proportion being 56.89 per cent of the total inhabited villages of the district. There are 120 villages of population range 2000—4999 constituting 12.53 per cent of the total inhabited villages of the district. Seven villages are of large size with their population falling in the range of 5000—9999. The remaining 286 villages forming 29.85 per cent of the total inhabited villages of the district comprise the population range less than 500.

Density :

TABLE 4
Distribution of Villages by Density

Range of density (per sq. km.)	Total No. of inhabited villages in each density range	Percentage of villages in each density range
1	2	3
—10	6	0·63
11—20	4	0·42
21—50	13	1·35
51—100	56	5·84
101—200	178	18·58
201—300	244	25·47
301—500	362	37·79
501+	95	9·92
Not known	..	..
Total	**958**	**100·00**

The density of population in the district works out to 472 per sq. km. at 1981 Census (which is substantially higher than the state density of 333). The density has recorded a significant increase during the decade 1971—81, the increase being 104 persons per sq. km. from 368 in 1971 to 472 persons in 1981.

There is a wide gap in the densities of rural and urban areas of the district, varying between 285 in rural areas and 4836 in durban areas.

Table 4 shows the distribution of villages by density.

The table reveals that 8.24 per cent inhabited villages of the district have density upto 100 persons per sq. km. 44.05 per cent inhabited villages have a density between 101—300 per sq. km., 37.79 per cent inhabited villages have density range 301—500 and the remaining 9.92 per cent possess density of more than 500 persons per sq. km.

Scheduled Castes Population:

TABLE 5

Proportion of Scheduled Castes Population to Total Population in the Villages

Percentage range of Schedi lea Castes population to total population	No. of inhabited villages in each range	Percentage of inhabited villages in each range
1	2	3
—Nil—	5	3·66
Less than 5	6	2·71
6—10	3	2·40
11—15	1	3·24
16—20	9	6·15
21—30	0	24·01
31 and above	4	57·83
Total	**958**	**100·00**

The district has comparatively lower percentage of scheduled castes population i.e. 25.18 per cent compared to 26·87 per cent for the state. Table 5 gives proportion of scheduled caste population in the inhabited villages of the district.

The table shows that out of the total 958 inhabited villages maximum 554 have 31 per cent and above Scheduled Castes population 230 (24.01 %) of the total inhabited villages of the district have a proportion of Scheduled Castes population ranging between 21-30 per cent. The number of inhabited villages in which the Scheduled Castes population ranges between 6—20 per cent is 113 (11.69 per cent) 35 inhabited villages of the district constituting 3.66 per cent of the total inhabited villages of the district report nil scheduled castes population.

TABLE 6

Proportion of Scheduled Castes Population in Towns

Name of the town	Total population	Total Scheduled Castes population	Percentage of Scheduled Castes population to total population
1	2	3	4
1. Doraha M.C.	7,606	757	9·95
2. Hathur N.A.C.	5,148	1,699	33·00
3. Jagraon M.C.	39,683	9,273	23·37
4. Khanna M.C.	53,761	9,670	17·99
5. Ludhiana M. Corp.	607,052	70,183	11·56
6. Machhiwara N.A.C.	9,621	2,731	28·39
7. Mullanpur Dakha N.A.C.	8,115	2,736	33·72
8. Payal M.C.	5,224	1,820	34·84
9. Raikot M.C.	17,106	5,581	32·63
10. Samrala M.C.	10,824	2,401	22·18
Total	**764,140**	**106,851**	**13·98**

Table 6 shows Scheduled Castes population in each town of the district. The Scheduled Castes population in all the urban areas of the district is 13.98 per cent. Payal M.C. has recorded the highest percentage of Scheduled Castes population to total population (34.84 per cent), Ludhiana M. Corp. the lowest (11.56 per cent) of the Scheduled Castes population. As compared to rural areas the urban areas have substantially lower proportion of Scheduled Castes population, the proportion of Scheduled Castes in rural areas being 33.29 per cent as compared to 13·98 in urban areas. There is no Scheduled Tribes population in the Punjab State, as no tribe has been notified as such in the state.

Literacy :

TABLE 7

Literacy Rates by Population Ranges of Villages

Range of Population	No. of inhabited villages in each range	Literacy rate
1	2	3
Less than 200	85	38·37
200—499	201	38·95
500—1999	545	43·39
2000—4999	120	45·67
5000—9999	7	40·71
10000+	..	..
Total	**958**	**43·69**

In the matter of literacy the district is at the top among the districts of the state. The percentage of literates to total population as recorded at 1981 Census is 50·60 per cent as compared to 42·63 per cent at 1971 Census and the corresponding state percentage of 41·28. The literacy rates of the rural and urban areas of the district respectively are 43·69 per cent and 60·14 per cent. Tahsilwise literacy rates for total, rural and urban areas are given in table 9.

Table 7 indicates literacy rates by population ranges of the villages.

The table shows that in general in large villages population of literates is more than in the smaller villages.

TABLE 8

Literacy Rates for Towns

Name of towns	Literacy rate
1	2
1. Doraha M.C.	66·23
2. Hathur N.A.C.	36·50
3. Jagraon M.C.	55·15
4. Khanna M.C.	56·62
5. Ludhiana M. Corp.	61·63
6. Machhiwara N.A.C.	50·69
7. Mullanpur Dakha N.A.C.	52·19
8. Payal M.C.	51·95
9. Raikot M.C.	47·29
10. Samrala M.C.	58·30
Total	**60·14**

Table 8 gives literacy rates for towns. The highest literacy rate of 66·33 per cent has been reported in Doraha town and the lowest (36·50 per cent) in Hathur. Ludhiana city has recorded a literacy rate of 61·63 per cent.

Working Population :

The main workers constitute 30·39 per cent of the total population in 1981 against 29·79 per cent in 1971 as compared to 29·35 per cent in 1981 for the state. There are 54·35 per cent male workers and 2·51 per cent female workers. Female workers have shown a significant improvement over 1971 wherein 1·43 per cent female workers were recorded. Out of a total working force, 43·84 per cent of the workers are engaged in agriculture as cultivators and agricultural labourers as against 50·80 per cent in 1971 Census. Thus there has been a decline of 6·96 per cent in the primary sector where as there has been a corresponding increase of 6·96 per cent in the secondary and tertiary sectors. This appears to suggest that the economy of the district has made great strides during the last decade and is moving ahead.

BRIEF ANALYSIS OF THE VILLAGE AND TOWN DIRECTORY

VILLAGE DIRECTORY

Amenities available in the Village :

In the annexures immediately following this note, distribution of villages according to availability of different amenities/facilities has been indicated in table 10 while table 11 indicates the proportion of rural population served by these amenities and table 14 indicates the distribution of villages according to population range and amenities available. Table 13 indicates the distribution of villages according to the distance from the nearest town and availibility of different amenities. According to it, out of 958 inhabited villages, 203 villages (21·19%) have a town at a distance upto 5 kms., 580 (60·54%) villages have an urban centre in distance slab of 6—15 kms. and the remaining 175 villages (18·27%) have an urban centre in a distance slab of 16.50 kms. This indicates that a fair number of villages are located near the urban centres and inhabitants of 175 villages have to cover a distance of more than 16 kms. to reach an urban centre.

Amenity-wise analysis reads below :

(i) *Educational facilities* : Of the total 958 inhabited villages in the district, 891 (93·01%) with a population of 98·93 per cent of the rural population of the district are equipped with the facility of atleast a Primary school. 67 villages of the district are, however devoid of this facility out of which 63 avail the facility by commuting a distance of less than 5 kms. and the remaining 4 by travelling a distance of between 5—10 kms.

(ii) *Medical facilities* : 278 villages (29·02%) out of 958 inhabited villages have at least one medical institution viz. Hospital, Maternity and Child Welfare Centre. Health Centre, Primary Health Centre, Dispensary Family Planning Centre and the like. The proportion of villages enjoying one or more medical facilities are the highest (34·92%) in Jagraon tahsil and the lowest (26·51%) in Samrala tahsil. The proportion of rural population enjoying the medical facilities in the district is 48·08 per cent, highest being in Jagraon tahsil (56·87%) and the owest in Samrala tahsil (41·16%). 680 villages in the district are devoid of medical facilities within the village. Out of these villages inhabitants of 552 villages could avail the medical facilities within a radius of 5 kms., for 122 villages within the range of 5—10 kms. and for the remaining 6 villages they have to travel more than 10 kms. to avail these facilities. The percentage of villages enjoying medical facilities is the highest (32·59%) among the villages having an urban centre within a distance range of 6-15 kms. wheras it is the lowest (15·43%) in a distance range of 16-50 kms. Among the villages having an urban centre within a radius of 5 kms., 30.54 per cent enjoy medical facilities. It can be inferred that lesser the distance from an urban area the more is the availability of medical facilities for the population of component villages. Apparently the villages in the neighbourhood of urban centres tend to have more medical facilities.

(iii) *Drinking water facilities* : All the inhabited villages of the district invariably enjoy the drinking water facilities. The main source of drinking water is Hand Pump supplemented by well/Tubewell.

(iv) *Post and Telegraph facilities* : Out of a total of 958 inhabited villages, 326 (34·03%) have the facility of Post & Telegraph. Tahsilwise percentage of villages enjoying the facility of Post and Telegraph is the highest (52.38%) in Jagraon tahsil and the lowest (23.46%) in Samrala tahsil. Proportion of rural population covered by Post and Telegraph facility in the district is 59.31 per cent, the highest proportion (78.67%) being in Jagraon tahsil and the lowest (43.10%) in Samrala tahsil. The Proportion of villages enjoying this facility in Ludhiana tahsil is 56.93%. Out of 632 villages which are devoid of the Post & Telegraph facility within their own jurisdiction, the population of 576 villages enjoy this facility by commuting a distance of less than 5 kms ; of 55 villages by covering a distance of 5—10 kms. and the remaining one village by travelling a distance of more than 10 kms. The percentage of villages enjoying P. & T. facilities is the highest (39.14%) among the villages within a distance slab of 6-15 kms. of an urban centre whereas it is the lowest (17.14%) in a distance range of 16-50 kms. For villages lying in the distance range of 5 kms. radius from an urban area 33.99 per cent possess this facility. Further. Post & Telegraph facility has been reported in 91.67 per cent of the villages of population range 2000—4999 and 100 per cent for villages of population more than 5,000 whereas it is the lowest (6.64%) in villages having less than 500 population. The Proportion of villages of population size 500—1999 to which this facility is available, is 34.86 per cent. Thus, proportion of the availability of Post & Telegraph facility bears direct co-relation with the size of the villages i.e. larger villages enjoying more facility as compared to smaller villages.

(v) *Communication* : The inhabitants of 59.50 per cent villages with a population of 73.75 per cent are being served by public transport system. This facility is however not available within the territorial jurisdiction of 388 villages of which 335 villages can avail this facility after commuting a distance within a radius of 5 kms. 47 villages within a distance of 5-10 kms. whereas population of remaining 6 villages avail at 10kms. and above. Of the 570 (59.50%) villages having the facility of public transport system, 108 (37.76%) villages fall in the population range of less than 500, 344 villages (63.12%) in the population range of 500—1999, 111 (92.50%) villages have their population between 2000—4999 and the remaining 7 villages have the population range of 5000 and above.

(vi) *Approach by Pucca Road* : Of the 958 inhabited villages of the district 935 (97.60 %) villages having poulation of 99.16% are linked by pucca road and are therefore, accessible round the year. Of the 23 villages which are not connected by pucca road, 11 fall in Jagraon tahsil 10 in Samrala tahsil and one each in Ludhiana and Khanna tahsils. Further of the 23 villages which are not approachable by a pucca road 16 villages have population less than 500 whereas the remaining 7 are in the population range 500—1999. However all the villages of population 2000 and above have been linked by pucca roads.

(*vii*) *Power Supply* : All the villages of the district have invariably got the facility of power supply as the state has since been hundred per cent electrified.

(*viii*) *Market/Hat* : Hat is not a common feature in the Punjab State. Only temporary markets are held in the state, generally on fairs and festivals.

Staple food :

Wheat and maize constitute the staple food of the people of the district. Rice is consumed mainly on special occasions as the Punjabis are not habitual rice eaters.

Land use pattern :

The land use pattern as depicted in Table 15 reveals that 87.80 %of the total area of the district is cultivable The highest proportion (88.93 %) of cultivable area is in Samrala tahsil and the lowest (85.13 %) in Khanna tahsil Ludhiana and Jagraon tahsils have respectively 86.25 per cent and 88.61 per cent of their total areas as cultivable. The proportion of irrigated area to the total cultivable area in the district is 90.69 %, the highest 95.94 %having been recorded for Khanna tahsil and the lowest 88.13 %in Ludhiana tahsil.

Cropping pattern and markets :

Wheat, maize, paddy, groundnut, cotton and sugarcane are the main crops of the district. There are good markets in the district such as Ludhiana, Jagraon, Raikot, Mullanpur, Khanna, and Samrala. These serve as purchase and sale centres for the surplus agricutural produce of this district. Their rapid expansion is an indication of the fruits enjoyed by the farmers as a result of green revolution ushered in the district.

TABLE 10

Distribution of Villages According to the Availability of Different Amenities

Serial No.	Name of Tahsil	No. of inhabited villages	No. (with percentage of villages having one or more of the following amenities)

Table 16 shows percentage of urban population, growth, density and sex ratio of urban population in the district in relation to the state. A comparative picture for the district and the state in respect of the above demographic characteristics has been given for 1981, 1971, 1961 and 1951 Censuses. It reveals that 42.01% Population of the district as compared to 27.68% of the state as a whole was living in urban areas of the district as recorded by 1981 Census. The percentage of urban component of the population during the last three decades in the district as compared to state was consistently higher, it being 24.18 per cent in 1951, 29.17 per cent in 1961, 34.79 per cent in 1971 as compared to corresponding state figures of 21.72 per cent, 23.06 per cent and 23.73 per cent respectively. There has also been a consistent increase in the percentage of urban population in the district, the component of urban population showing an increase of 4.99% during 1951—61, 5.62% during 1961—71 and 7.22% during 1971—81.

Growth Rate :

The district shows a decadal urban growth rate of 54.66% as compared to 44.51% for the state in 1981. The decadal growth rates during 1951—61 and 1961—71 of the district were 51.96% and 53.00% as compared to urban growth rate of 29.06% and 25.27% respectively. The high urban growth rate of the district can be attributed primarily to higher economic opportunities available in the district, particularly in Ludhiana City which attracts migrants from other rural and urban areas of the district, other districts of the state and other states of the country.

Density :

The district has recorded an urban density of 4845 persons per sq. km. as against 3875 for the state as a whole. There has been a consistent and significant increase in urban density since 1951. The density increased from 1347 in 1951 to 2048 in 1961, 3133 in 1971 and 4845 in 1981. As compared to state the density of the district both in 1961 and 1971 was substantially lower, However in 1981 density of the district has appreciably increased as compared to the state. The density of the district was 2048 and 3133 in 1961 and 1971 respectively as compared to corresponding state density of 4090 and 4648 respectively.

Sex Ratio :

There has been a decline in the urban sex ratio of the district since 1951. The district showed a sex ratio of 832 females per 1,000 males in 1981 against to 846 in 1961, 843 in 1951 and 823 in 1971. As compared to state the district had a higher sex ratio in 1951 and 1961, the district sex ratio being 846 compared to 807 of the state in 1951, it being 843 corresponding to 817 of the state in 1961. However, both in 1971 and 1981 the district recorded a lower sex ratio as compared to the state, the district sex ratio being 823 in 1971 as against to 856 of the state and 832 for the district compared to 865 for the state in 1981.

New Towns :

TABLE 17

New Towns/Towns Declassified in 1981 Census

Name of Towns			Population in 1981 Census
1			2
(a) Added	(i) Hathur N.A.C.	..	5,148
	(ii) Mullanpur Dakha N.A.C.	..	8,115
	(iii) Machhiwara N.AC.	..	9,621
	(iv) Payal M.C.	..	5,224
(b) Declassified		..	Nil.

Table 17 gives information of new towns and declassified towns during the decade. Four new towns namely Hathur N.A.C., Mullanpur N.A.C., Mac hhiwara N.A.C. and Payal M.C. were added to the list of towns existing at 1971, during the decade 1971—81. No town from those existing at 1971 has been declassified. Hathur N.A.C was abolished by a notification by state Government in October, 1980. But for 1981 Census the list of 134 towns was adhered to since it was necessary to freeze the urban frame finalised for the purpose of 19.81 Census. The urban status of Hathur as N.A.C. has therefore, been retained.

Budget of New Towns :

Table 18 gives details of budget of the towns

N.A. :—Stands for not available.

Ludhiana district has 10 towns, one with Class I status viz., Ludhiana City, one class II town namely Khanna, one class III town, viz., Jagraon, two class IV towns Raikot and Samrala, and five class V towns, Doraha, Hathur, Machhiwara, Mullanpur Dakha and Payal. In respect of six towns namely Doraha, Jagraon, Ludhiana, Machhiwara Payal, and Raikot, per capita receipt is higher than per capita expenditure but in case of three towns per capita receipt is lower than the per capita expenditure. However for Hathur N.A.C. the data is not available. The highest per capita receipt of rupees 113.78 has been recorded for Doraha M.C. and the lowest rupees 2.82 for Machhiwara N.A.C. For Ludhiana City per capita receipt is rupees 91.66. The receipts through taxes form the major source of revenue in most of the towns of the district. Government grants, loans, advances etc., are the other supplementary sources of revenue of. Municipalities. On the expenditure side the highest per capita expenditure of rupees 93.65 has been recorded for Mullanpur Dakha N.A.C. and the lowest rupees 2.12 for Machhiwala N.A.C. In respect of Ludhiana Municipal Corporation per capita expenditure of rupees 90.18 has been recorded as against the per capita receipt of rupees 91.66. The main heads of expenditure are the Public Works, Public Health and conveniences, general administration, public institutions etc.

Total	**0·29**	**0·64**	**0·37**	**4·71**

N.A. :—Stands for not available.

Table 19 depicts Higher Secondary, Secondary, Matriculation/Junior Secondary/Middle and Primary school per 10,000 population. The table reveals that higher secondary schools are only in six towns of the district namely Ludhiana, Khanna, Jagraon, Samrala, Mullanpur Dakha and Raikot. Ludhiana City has the highest number (14) of higher secondary schools, (30) secondary/Matriculation schools, (22) Junior Secondary and Middle schools and 318 primary schools. But considering its size of population the number of school is not very high. The table reveals that number of Higher Secondary Schools per 10,000 population is the highest (1.23) in Mullanpur Dakha and the lowest 0.23 in Ludhiana city. Payal M.C. has the highest number (3.83) of Secondary/Matriculation schools per 10,000 population and the lowest 0.19 is in Khanna M.C. Middle Schools are in 4 towns namely Ludhiana, Khanna, Mullanpur Dakha and Samrala. Mullanpur Dakha has 1.23 Middle Schools per 10,000 population whereas Ludhiana city has the lowest 0.36. Ludhiana city with 5.24 Primary Schools per 10,000 population leads other towns followed by Khanna (3.91), Payal (3.83), with the lowest (1.17) in Raikot town.

Medical Facilities :

TABLE 20

Number of Beds in Medical Institutions in towns

Class, name and civic status of the town	No. of beds in medical institutions per 1,000 population
1	2
V—Doraha (M.C.)	1·05
V—Hathur (N.A.C.)	5·83
III—Jagraon (M.C.)	0·63
II—Khanna (M.C.)	1·58
I—Ludhiana (M. Corp.)	2·97
V—Machhiwara (N.A.C.)	3·12
V—Mullanpur Dakha (N.A.C.)	0·74
V—Payal (M.C.)	1·53
IV—Raikot (M.C.)	0·23
IV—Samrala (M.C.)	4·62
District Total	**2·68**

Table 20 gives the number of beds in medical institutions per 1,000 population townwise in the district.

The number of beds per 1,000 population has been taken as the criterion for determining the extent of medical facilities. The table reveals that there are in all 2.68 beds per one thousand population in the district. Ludhiana city has the highest number of beds (1802) but the number of beds per 1000 population comes to 2.97 which is lower than the corresponding figures of 5.83 for Hathur N.A.C. and (3.12) for Machhiwara N.A.C. The lowest number of beds per 1000 population (0.23) has been recorded for Raikot M.C.

PART XIII A

VILLAGE AND TOWN DIRECTORY

SECTION I—VILLAGE DIRECTORY

NOTE EXPLAINING THE CODES USED IN THE VILLAGE DIRECTORY

The village directory containing information about each village has been prepared for each tahsil in the ascending order of the census location code numbers, e. g. location code No. 11/3/22 means village No. 22 in tahsil No. 3 of district No. 11. It contains information relating to total area of the village in hectares, total population, No. of households, amenities available in the village i.e., educational, medical, drinking water, posts and telegraphs, communication, approach to village, nearest town and distance (in kms), and power supply. Besides it gives infomation regarding staple food, land-use i.e., area under different types of land use like forest, irrigated and unirrigated land, cultivable and uncultivable land. This is further supplemented by the information on places of religious, historical and archaeological interest as also information on copies of newspaper coming in the village and number of motor cycles/scooters, cars/jeeps and tractors available in the village.

Information about the amenities available has been given in columns 5 to 10 of the directory.

(i) Educational facilities have been shown by adopting the following abbreviations:

P	=	Primary school
M	=	Junior secondary or Middle school
H	=	Matriculation or Secondary school
PUC	=	Higher secondary/Intermediate/Pre-university/Junior college.
C	=	College (graduate level and above) like Arts, Science, Commerce etc.
I	=	Industrial school
Tr.	=	Training School
AC	=	Adult literacy Class/Centre
O	=	Other educational institutions. These may include Sanskrit Pathshala, senior basic school, Maktab, etc.

Where figures like P(3), M(2), H(1) etc. occur, these denote that the village has three primary, two middle and one matriculation or secondary school.

(ii) Medical facilities have been shown by the use of the following abbreviations:

H	=	Hospital
MCW	=	Maternity and Child Welfare Centre
MH	=	Maternity Home
CWC	=	Child Welfare Centre
HC	=	Health Centre
PHC	=	Primary Health Centre
PHS	=	Primary Health Sub-Centre
D	=	Dispensary
FPC	=	Family Planning Centre
TB	=	T B Clinic
NH	=	Nursing Home
RP	=	Registered Private Practitioner
SMP	=	Subsidised Medical Practitioner
CHW	=	Community Health Worker
O	=	Others

Number of institutions, if more than one in any village, have been given in brackets against each.

(iii) The types of the potable drinking water supply and the sources availabe in the village have been indicated by the following codes:

T	=	Tap Water
W	=	Well Water
TK	=	Tank Water
TW	=	Tubewell Water
HP	=	Hand Pump
R	=	River Water
F	=	Fountain
C	=	Canal
L	=	Lake
S	=	Spring
N	=	Nullah
O	=	Others
NA	=	Information not Available

(iv) Post & telegraph facilities have been shown by adopting following abbreviations:

PO	=	Post Office
TO	=	Telegraph Office
PTO	=	Post and Telegraph Office
Phone	=	Telephone connection

(v) Communication facilities have been indicated by the following codes:

BS	=	Bus Stop
RS	=	Railway Station
NW	=	Navigable Waterway (including river, canal, backwaters, etc.).

Only public transport like bus, rail and waterway have been considered for this purpose.

(vi) *Approach to village* : This refers to the state of road etc. leading to the village.

This has been indicated by the use of following codes:

PR	=	Pucca Road
KR	=	Kaccha Road
NR	=	Navigable River
NC	=	Navigable Canal
NW	=	Navigable Waterway (other than river or canal).

(vii) ***Nearest town and distance*** : The distance in kms. of the nearest town (whether located in the state or in another state) has been given in brackets under column 12.

(viii) ***Power supply*** : For this purpose, the following codes have been used under column 13:

ED	=	Electricity for domestic purpose
EAg	=	Electricity for agriculture
EO	=	Electricity for other purpose like Industrial, Commercial, etc.
EA	=	Electricity for all purposes listed above.

Information relating to places of religion, historical or archaeological interest is given under column 20(a). Information on copies of newspaper coming in the village (N), motor cycles/scooters available in the village (M), cars/Jeeps available in the village (c), and for tractors available in the village (T) is also furnished under column 20. The numeral following the alphabet indicates the number of newspapers, motor cycles etc. Uninhabited villages and the villages that have got merged in towns have also been shown under column 20(a).

(ix) *Land use* : Break-up of area under different types of land use viz. forest, irrigated area, unirrigated area, culturable waste and areas not available for cultivation has been furnished under columns 15—19.

(*a*) *Forest* This includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether state-owned or private, and whether wooded or maintained as potential forest land. The area of crops raised in the forest and grazing lands or areas open for grazing within the forest has been included under the forest area. If any portion of such land is not actually wooded but put to some agricultural use, that portion is included under the appropriate heading of cultivated or uncultivated land. In some cases there are instances where patches of land put to agricultural use within statutorily notified forests are considered as forests by the revenue agency. These are treated as forests.

(*b*) *Irrigated and unirrigated* (*Land use*): These two columns (cols. 16 and 17) cover all agricultural land and include net area sown with crops and orchards or net cropped area and also current and other fallows. The latter implied all lands which were taken up for cultivation, but are temporarily out of cultivation for a period of not less than a year and more than five years. The columns do not include gross area sown or gross cropped area. Net area sown thus represents the area sown with crops and orchards, counting areas sown more than once in the same year only once.

(*c*) *Culturable waste*: This includes all lands available for cultivation whether taken or not taken up for cultivation once, but not cultivated during the five years or more in succession. Such lands are either fallow or covered with shrubs and jungles which are not put to any use. These have been assessed or unassessed and are in isolated blocks or within cultivate holdings. Lands under thatching grasses, bamboo bushes and other groves for fuel, etc., which are not included under orchards or forests also come under this head. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area have been included in this column.

(*d*) *Area not available for cultivation* : This column (Col. 19) includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use.

Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water, e.g., rivers and canals and other lands put to uses other than agricultural.

Barren and unculturable lands cover all barren and unculturable lands like mountains, deserts, etc. Land which cannot be brought under cultivation, except at a very high cost, has been classified as unculturable, whether such land is in isolated blocks or within culivated holdings.

SECTION—II
TOWN DIRECTORY

NOTE EXPLAINING THE CODES USED IN THE TOWN DIRECTORY

The town directory has been compiled in six different statements for all the urban areas of the district. The data on amenities and other aspects have been presented in codes which are explained below.

Statement-I

This Statement gives the status and growth history of each town in the district.

Class has been introduced in all the statements of town directory to facilitate analysis for purpose of demographic and socio-economic characteristics of towns at the state and all India levels. It has been presented according to 1981 census population of the core town in the following manner:

Population	Class
100,000 and above	I
50,000—99,999	II
20,000—49,999	III
10,000—19,999	IV
5,000—9,999	V
Below 5,000	VI

The civic administration status as in 1980 has been indicated by the following abbreviations. Census towns are regarded as having no civic status. Code (C.T.) has been used for census town.

Municipal Corporation	..	M. Corp.
Municipal Committee	..	M.C.
Cantonment Board	..	C.B.
Notified Area Committee	..	N.A.C.
Census Town (S.A.S. Nagar (Mohali) and Talwara)	..	C.T.

Statement-II

Statement-II gives for each town, physical aspects and location.

Statement-III

This statement gives municipal finance for each town of the district.

Statement-IV

It gives civic and other amenities. The abbreviations used are indicated below:

(I) **Road Length** :

PR =Pucca Road

KR=Kucha Road

(II) **System of sewerage**

S =Sewer

OSD=Open Surface Drains

BSD=Box Surface Drains

SD =Sylk Drains

CD =Cesspool method

Pt =Pit system

(III) Method of disposal of night soil

HL=Head Loads

B =Baskets

WB=Wheel Barrows

ST =Septic Tank Latrines

S =Sewerage

(IV) Protected water supply source and capacity of storage systems :

(a) Sources of water supply:—

TW =Tubewell water/Handpump

T =Tap water

W =Well water

TK =Tank water

(b) System of storage of water :

OHT=Overhead tank

SR =Service reservoir

IG =River infiltration gallery

BWP=Borewell pumping system

PT =Pressure tank

Statement V:

This gives medical, educational, recreational and cultural facilities. The abbreviations used are indicated below:

Medical amenities:

H =Hospital

D =Dispensary

HC =Health centres

FC =Family planning centre

TB =T.B. clinic

NH =Nursing Home

O =Others

A =Ayurvedic

U =Unani

Hom.=Homoeopathic

In case of allopathic, no separate code has been given. The information in col. 4 on medical facilities has been presented horizontally in the same line as illustrated below:—

H(A-1, 2)   D(Hom-2, 1,U-1)

Here H(A-1, 2) represents one ayurvedic and 2 allopathic hospitals and D(Hom-2, 1,U-1) represents 2 Homoeopathic, one allopathic and one unani dispensaries. If the medical facility is not available in a town, name of the nearest place (if in the same district) or nearest district (if in the same state) or other state and its distance from the town where the facility is available has been mentioned in column 4.

Educational amenities:

The codes that have been used are as follows:

A	=	Arts only
S	=	Science only
AS	=	Arts and sceince only
C	=	Commerce only
AC	=	Arts and commerce only
ASC	=	Combined for all categories-Arts, Science and Commerce.
L	=	Law
SH	=	Shorthand
Type	=	Typewriting
Sh. Type	=	Shorthand and Typewriting
O	=	Others
P	=	Primary School
M	=	Junior secondary or middle school
H	=	Matriculation or secondary
PUC	=	Higher secondary/intermediate/Pre-university/Junior college/ '10+2' system whether held in Schools or Colleges.

If there are more institutions of a type in the town, their number has been given against each in brackets.

If any educational facility is not available in the town the name of nearest place (if in the same district) or the name of nearest district (if in the same state) or other state and its distance from the town where this facility is available has been given in brackets.

Recreational and cultural facilities:

The following codes have been used:

PL	=	Public library
RR	=	Reading room.

Statement VI :

Gives information on trade, commerce, industry and banking for each town of the district.

Appendix to the town directory shows towns of the district which have outgrowths and population of outgrowths.

Primary Census Abstract (Scheduled Castes)

PART B

PRIMARY CENSUS ABSTRACT (GENERAL)

Primary Census Abstract (Scheduled Castes)

EXPLANATORY NOTE ON PRIMARY CENSUS ABSTRACT

The Primary Census Abstract (PCA) General and Scheduled Castes provides the basic information relating to population data pertaining to 1981 census. It contains the data in respect of areas, number of occupied residential houses and households, total population (including institutional and houseless population), population break-up by sex, scheduled castes, literates, main workers classified into four categories of cultivators, agricultural labourers and other workers, marginal workers and non-workers for each village and for each town/wardwise.

The district totals given at the beginning of the PCA are followed by break-up of rural and urban areas of the district. The data are presented tahsilwise.

The rural PCA presents the data for the villages arranged in ascending order of location code numbers (assigned to the villages within the tahsil). The urban PCA presents wardwise data for each town. In rural PCA the uninhabited villages and the villages which have got merged in towns have also been indicated. It may be mentioned here that the PCA data provided here has been compiled on the basis of the basic schedules i.e., household schedules and the universal individual slip canvassed during 1981 census operations. The concepts and terms occuring in the PCA are briefly explained here.

Census House :

A census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

Occupied Residential House :

Occupied residential house is a dwelling house and includes a house used partly as dwelling and partly for some other purpose like shop, workshop, factory, etc., but does not include a 'vacant house' where no person was found to be residing at the time of census.

Household :

A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated households are boarding houses, messes, hostels, residential hotels, rescue homes, jails, *ashrams*, etc. These are called 'Institutional households'. There may be one member households, two members households or multi member households. For census purposes, each one of these types is regarded as a 'household'.

Another type of household for census purpose is houseless household which is a household comprising 'houseless person/persons'. A houseless person in census terminology has been defined as :

(i) a person who might be doing domestic service or other work with one or more households, but who does not reside in any house and sleeps in the corridors, verandahs or passages in buildings or in the streets ;

(ii) wandering or nomadic tribes found to be staying in temporary huts etc. ; and

(iii) beggar, vagrant, tramp, sadhu, fakir, etc., who is found on the footpaths, streets, in places like parks, gardens, railway yards, etc.

Scheduled Castes :

Scheduled casts are such castes, races or tribes or parts of groups within such castes, races or tribes as are declared to be scheduled castes by the President of India's orders issued under Article 314 of the Constitution of India.

Literate :

A person who can both read and write with understanding in any language has been taken as literate. A person who can merely read but cannot write, has not been considered as literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

All children of the age of 4 years or less have been treated as illiterate even if the child has been going to a school and might have picked up reading and writing a few odd words.

Workers and Categories of Workers :

Work may be defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

In the economic questions, canvassed in 1981 census, there has been some difference. The 'work' concept of 1961 and 1971 censuses, as opposed to the 'income' or 'economic independence' concept of the earlier censuses was adopted for 1981 census, but the criterion for classification of persons as workers was changed. While in 1961 and 1971 censuses different approaches, namely, usual status and current status, were adopted with reference period of one year and one week for seasonal and foi regular work respectively, at the 1981 census the usual status approach was adopted uniformly for all work.

In 1961, a person qualified as a worker if he had worked regularly during the last season or if he had worked, at least for a day in regular (non-seasonal) work during the preceding fortnight. At the 1971 census a person was treated as a worker only if he spent his time mainly in work or if he worked at least for a day in regular (non-seasonal) work during the preceding week. The dichotomy of worker/non-worker of 1961 and 1971 censuses was discarded at the 1981 census and instead a trichotomy of main worker, marginal worker and non-worker was adopted. For main worker the time criterion of engagement in work for the major part of the year, i.e.,at least 183 days was adopted. Those who worked for some time during the last year but not for the major part were treated as marginal workers. Those who had never worked during the last year were non-workers. This trichotomy partially permits a comparability of 1981 census economic data with that of 1971 as well as 1961. The main workers of 1981 census can be expected to correspond to the workers of 1971 and the main workers and marginal workers of 1981 together to correspond to the workers of 1961.

Classification of Main Activity :

The main activity of workers has been classified into four categories, viz., cultivators, agricultural labourers, household industry and other workers. These terms are explained below :

Cultivator :

For purposes of the census, a person has been considered working as cultivator if he or she has been engaged either as employer, single worker or family workers in cultivation of land owned or held from government or private persons or institutions for payment in money, kind or share. Cultivation included supervision or direction of cultivation. has been indicated by abbreviation 'C'.

Agricultural Labourer :

A person who worked in another person's land for wages in money, kind or share has been regarded as an agricultural labourer. He/she had no risk in the cultivation but he/she merely worked in another person's land for wages. An agricultural labourer had no right of lease or contract on land on which he/she worked. It has been indicated by abbreviation 'AL'.

Household Industry :

Househod industry has been defined as an industry conducted by the head of the household himself/herself and or by the members of the househola at home or wihin the village in rural areas and only within the precincts of the house where the household lived in urban areas. The larger proportion of workers in a household industry constituted of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act.

For a person who has returned his/her main activity as engaged in some production, processing, servicing or repair of articles or goods such as handloom weaving, dyeing, carpentary, *bidi* rolling, pottery manufacture, bicycle repairing, blacksmity, tailoring, etc. It has been ascertained if it is a household industry, and if so, it has been indicated by the abbreviation 'HHI' in the space provided for,

Other Workers :

All workers, i.e., those who have been engaged in some economic activity during the last one year, have not been categorised as cultivators or agricultural labourers or in household industry, are 'other workers' 'OW'. The type of workers that came under the category 'OW' included factory workers, plantation workers, those in trade, commerce, business, transport, mining, construction, political or social work, all government servants, municipal employees, teachers, priests, entertainment artists, etc.
